## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species:
  - a. Direction detection with 2 magnets and 4 Hall sensors
  - b. Direction detection with 4 projections and 3 Hall sensors
  - c. Direction detection with 1 projection, 2 magnets, and 3 Hall sensors
  - d. Direction detection with 1 magnet, 2 Hall sensors for the N pole of the magnet, and 2 Hall sensors for the S pole of the magnet
  - e. Direction detection with 1 magnet, 1 Hall sensor for the N pole of the magnet, and 1 Hall sensor for the S pole of the magnet.
2. The species are independent or distinct because they all use different methods to detect a direction. All of these methods are described as *mutually exclusive* in the specification. For instance, fig. 3 refers to species a, fig. 4 refers to species b, fig. 5 refers to species c, fig. 8 refers to species d, and fig. 10 refers to species e. Also see pages 6-11 of the specification where each species is described separately. There is no disclosure that supports the use of more than one of these species together.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims that are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
